HARSHA VARDHAN R

Aspiring Data Scientist | B.Tech Computer Science Undergraduate | Bengaluru, India | +91 6362433439 |
harsharaj4904@gamil.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in machine learning, data analysis, audio/signal feature extraction, and full-stack application development. Proficient in Python, SQL, machine learning fundamentals, data visualization, and core computer science concepts. Experienced in building end-to-end prototypes through hackathons and internship work. Seeking entry-level opportunities in Data Science, Machine Learning, AI, or Software Engineering.

EDUCATION

Presidency University, Bengaluru **Expected June 2027**

Bachelor of Technology, Computer Science and Engineering — CGPA: 8.02/10 (7th Semester)

St. Francis Composite PU College, Koramangala, Bengaluru

Pre-University (PCMC) — 90%

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, PHP, SQL

Web & Frontend: HTML, CSS, React.js

Database: MySQL

Data Science / ML: Machine Learning Fundamentals, Data Analysis, Signal/Audio Feature Extraction, Data Visualization

Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms

DATA SCIENCE & MACHINE LEARNING PROJECTS

BovoSense — Acoustic Respiratory Health Analyzer | Hackathon Project

- Built an ML model that analyzes respiratory and vocal sound patterns of cows and buffaloes to detect early signs of illness, enabling non-invasive livestock health monitoring.
- Engineered audio features including pitch, frequency spectrum, and breathing rate from raw sound recordings and trained a classification model to flag abnormal respiratory patterns.

EmotoBot — Emotion-Aware AI Companion | Hackathon Project

- Designed an AI chatbot that predicts user emotion from conversational input and responds empathetically as a supportive virtual companion.
- Implemented an emotion-classification model to interpret user sentiment and adapt chatbot responses in real time.

INTERNSHIP EXPERIENCE

App Developer Intern | Plentra Technologies | Bengaluru — Jul 2025 – Aug 2025

- Contributed to KollegeKit, an in-campus marketplace app enabling students to buy, sell, and exchange goods/services.
- Built and tested core marketplace features, including listings and user interactions, within a development team under mentor guidance.
- Gained exposure to the end-to-end mobile application development lifecycle using Git-based version control.

ADDITIONAL PROJECTS

- **SentinelWall — Adaptive Firewall Rule Engine:** Developed a security utility to strengthen firewall rule management and improve network traffic filtering.
- **PulseGrid — Smart Traffic Signal Optimizer (IoT):** Designed an IoT-based prototype that dynamically adjusts traffic signal timing using real-time sensor data to reduce congestion.
- **ClassTrack — Offline Attendance ERP (Full-Stack, Java):** Built an offline attendance management system with a Java-based backend and structured database for institutional use.
- **ShopSphere — Full-Stack E-Commerce Platform:** Developed an e-commerce platform with product listings, cart, and order management functionality.

CERTIFICATIONS & ACHIEVEMENTS

- Blockchain Fundamentals — IBM (2025)
- Data Visualization — Infosys Springboard (2025)
- Object-Oriented Programming in Python — GeeksforGeeks (2024)
- JavaScript — GeeksforGeeks (2026)
- HTML & CSS — GeeksforGeeks (2026)
- Participated in multiple hackathons, building functional ML and full-stack prototypes under time constraints.
